

Resilient supply chains for manufacturers

Executive Summary

- **Customers:** Supply Chain Managers who are disrupted by geopolitical and climatic events.
- **What it does:** Maps your commodity and vendor footprints and gives early warnings and scenarios when external risks threaten your supply chain.
- **Benefits:** Instant incident response; understand operational consequences before they hit, without the need for manual investigations.

Problem

Companies are highly vulnerable to external shocks:

- Political conflicts, sanctions, trade barriers, and extreme weather events cause supply chain disruptions.
- Companies rely on traders, distributors, and local teams to signal when something is going wrong.
- Scenario planning for raw materials takes days and still feels like guesswork.

Solution

We provide an agentic AI-driven platform that connects external events with your supply chain data:

1. **Detect risks earlier:** Spot emerging risks weeks before suppliers or markets react.
2. **Map impact:** See instantly which materials, suppliers, routes, and customers are affected.
3. **Model scenarios:** Understand likely outcomes and stress-test your supply chain.
4. **Recommend actions:** Receive tailored mitigation steps

Current Traction

- **A3M:** A leading German event risk provider leveraging agentic AI to streamline its products.
- **The United Nations (UNHCR):** Building a legal risk assessment tool.
- **University of Zurich:** Providing research funding.

Founder Team

- **Kilian Sprenkamp, PhD Candidate (CEO):** builds LLM agents on complex geo & risk data
- **Konstantin Gerner, MSc (COO):** ex-crisis & risk-consultant for international corporates
- **Guy Fischman, MBA (CTO):** AI Agent Expert & ex-Google Supply Chain Manager

Talk to us: If you want to cut emergency procurement costs and prevent avoidable stockouts, we can map your top risks instantly.
